

# Known For Toughness, Endurance And Strength Of Character

**T**he husky arctic dog is strong and loyal. It easily pulls one and a half times its weight under exhausting conditions.

Like the sturdy working dogs of the Arctic, HuskyLite® half-depth crates are rugged and dependable. Four-window, six-window and PET models accommodate a full range of 16 and 20 oz products. Produced from premium grade, high-density polyethylene, the crates are made to be durable. Twist and lock bottom provides superior stability. This feature also lets the driver unlock and slide crate without lifting. Scalloped wall design protects labels. The bottom is engineered to eliminate stretch wrapping of pallets. Crates nest and stack three pallets high. Gripping is easy with large, conveniently located handles. Recyclable HuskyLite half-depth crates are manufactured by Rehrig Pacific, an American owned and operated company with a reputation for producing quality products for over 80 years.
