

Rehrig Pacific Organic Waste Containers

Rehrig Pacific is proud to offer **Organic Waste Containers** that are proven for quality and performance. Based upon extensive research, testing and customer feedback, Rehrig Pacific Company has engineered the consummate containers for collection of organic wastes.

The Yard Waste Cart, available in 65 and 95 gallon sizes, boasts a superior ventilation system that stimulates aerobic decomposition while promoting proper odor dissemination. This patented system quickly reduces the weight and volume of organic wastes, giving recycling programs the flexibility and cost-savings of bi-weekly collection. An internal, hinged bottom assembly pivots to prevent trapped debris during dumping.

The 40lt (10.5 Gallon) Collection Cart, designed for organic kitchen waste or recyclables, features an attractive tilt and roll design and compact size for easy transport and convenient home storing. The pre-assembled carts are well balanced and have no internal catch points. They are designed with multiple grab areas for easy manual dumping, and have four ground contact points for extra stability.

The Food Waste Container is the clean and easy way to collect and carry organic kitchen waste to the main curbside collection container. The 2 gallon container is also dishwasher safe.
