Automated or Manual, Rehrig Pacific Public Litter Containers  
Increase Collection Efficiency

Rehrig Pacific consistently delivers innovative and sustainable products and services providing real value for communities and haulers throughout North America.

Collection efficiency is increased with skillfully designed Rehrig Pacific Public Litter Containers. Cost-saving automated collection is possible when containers are placed curbside, at bus stops or in busy downtown business and shopping areas. Manual collection is more efficient too for containers placed along high-traffic pedestrian pathways in parks, stadiums, schools, convention centers or at special event sites.

Collection vehicles with side loader arms can securely grasp, dump, and replace these containers without drivers leaving their cabs. Weighted bases provide stability; gravity locks open at 90 degrees of tilt and textured surfaces help speed automated collection. Wide opening lids and a reusable injection molded plastic liner, which can be used with or without bags, make manual collection quick and easy.

Made with durable, impact and graffiti resistant resins, these litter containers clean easily and have large areas for logos and slogans on all four sides. Optional granite colors and colorful in-mold labels add a welcoming, sophisticated image to any community or public space.

Base and body assemble quickly and securely

Wide opening lid speeds collection

A FAMILY TRADITION OF GROWTH, SERVICE AND INNOVATION

**Public Litter Containers  
Features & Options**

**Features**

- Double wall construction in load bearing areas for increased strength and durability
- High impact polyethylene resin with anti-oxidants and UV stabilizers for long life indoors or in sunlight
- Choice of graffiti resistant easy-to-clean standard colors
- Container bodies are highly nestable for efficient shipping and storage
- Factory assembled lids save installation time and expense
- Weighted six-bolt base deters theft and provides a stable container platform
- Bolt locating guides aid base installation
- Recessed branding and label areas protect graphics from wear
- Domed, 4-way entry lid provides easy access from all sides
- Wide opening hinged lid speeds collection
- Smooth interior prevents snagged or trapped materials when auto-dumping
- 3-Piece design allows replacement of parts as needed

**Options**

- Gravity lid lock restricts scavenging in upright position, but releases at 90 degrees of tilt when being dumped by automated lifters
- Choice of granite colors
- In-mold color labels for logos and slogans
- Reusable injection molded 32 gallon plastic liner
