40 x 40 Wide Stringer Plastic Dairy Pallet

Listening to the needs of the dairy industry, Rehrig Pacific has built a superior plastic pallet that conforms to their need for strength, durability, and cleanliness. High-pressure injection molding gives us the ability to strengthen the areas that take the most abuse, like corners and leading edges.

The solid top deck improves loading and provides uncommon stiffness for a two-way entry stringer pallet. Optional steel reinforcements even support edge racking when needed. Loose fasteners, splinters and broken boards are a thing of the past and our high-impact resin won't absorb moisture or harbor bacteria like wooden or other types of plastic pallets.

With consistent dimensions and a molded-in hook feature, these lightweight, easy handling plastic pallets will improve the cleanliness and efficiency of any dairy operation.

Features:

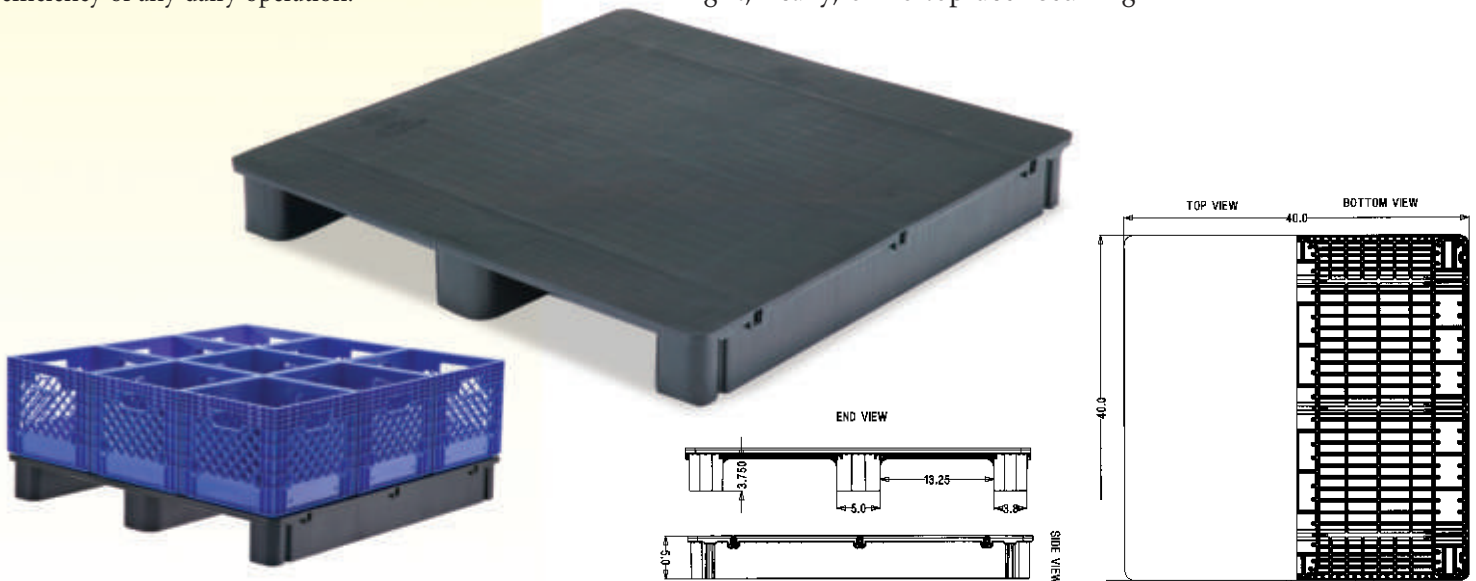

- Patented Box Beam™ design*
- Lightweight yet durable
- Consistent dimensions
- Solid top deck
- Hook areas on each corner
- Won't absorb moisture or harbor bacteria

Material:

UV stabilized high impact co-polymer polypropylene resin

Options:

- FDA approved colors
- 2.5" or 3.8" outside stringers
- Steel reinforcements
- Molded-in straight or beveled perimeter deck lip
- Light, heavy, or no top deck scuffing

*N.E.R. = Not Edge Rackable

Product	Entry	Reinforcement	Options	Width (W)		Length (L)		Height (H)		Weight		Maximum Static Load		Maximum Dynamic Load		Maximum Edge Rackable Load
