

Rehrig Pacific
Company
Since 1913

**“SAVE SPACE AND MONEY
WITH LESS BREAKAGE”**

Advantages of using a Rehrig Egg Crate

- Made with premium-grade HDPE for superior strength and rigidity
- HDPE is FDA-approved
- Less breakage and unsaleables in the plant and at the retail level
- Less labor in the stores
- Stack your eggs higher
- Optimize your trucks: Delivery & Backhauls
- **For example: On a 53' Trailer, using 48x40 pallets, you can ship, on average, 24,000 more eggs using a Rehrig crate compared to a corrugated box. That's a reduction of one truck for every 12 that you ship!**
- 100% recyclable plastic, no metal parts
- Anti-theft and crate alignment feature
- No more cutting open/around corrugated boxes to make the eggs presentable to the consumer
- Plastic returnable design means significant savings on packaging costs and reduces need for waste disposal
- Better protection of eggs during transit
- The Rehrig crate can accept all carton sizes, including two and a half dozen sleeves
- Consistent, durable crate works extremely well in automated systems

Additional Information

- Weight: 4.0 lbs.
- Crates per truckload (collapsed): 5,382*
- Crates per truckload (with product): 1,638*

*Based on 53' trailer. Size of trailer and pallets may vary.

In addition to this product, we also offer a non-collapsible design with the same dimensions.

15 DOZEN COLLAPSIBLE EGG CRATE

Dimensions:

O.D. 13.0" x 13.0" x 14.35"

I.D. 12.0" x 12.0" x 14.00"

Collapsed Stacking Increment: 4.35"

Ratio: 3.3:1
