

Plastic Tier Sheets

The Reusable, Sanitary Separator Solution

Since 1913, Rehrig Pacific has consistently delivered products and services that provide real competitive advantages and productivity improvements for our customers.

Plastic Tier Sheet Benefits

- Moisture, chemical and bacteria resistant
- Attractive payback on investment
- Increased load stability
- Seamless integration into automated systems
- Compatible with all pallets
- Buy-back program available

Customizable

- Available in standard or custom sizes and thicknesses
- Materials can be blended to meet different stiffness requirements
- Surface coefficient of friction (COF) can be adjusted to meet your specifications
- Standard and custom colors available
- Options for printing company names and product identifiers

Durable & Sustainable

- Made with proprietary co-polymer polypropylene (PP) resin
- 100% recyclable
- Reusable
- Pooling options available
- Cleanable/washable
- Snag-free rounded corners – 2" radius
- Static resistant

Customizable Plastic Tier Sheet

Plastic Tier Sheet dimensions, materials and the surface coefficient of friction (COF) can all be modified to meet your specific requirements. Call today to discuss your needs.

A FAMILY TRADITION OF GROWTH, SERVICE AND INNOVATION

Plastic Tier Sheets

A Heritage of Innovative Solutions

Since 1913, Rehrig Pacific has consistently delivered products and services that provide real competitive advantages and productivity improvements for our customers. Combined with our widely recognized commitment to customer service, we've become a leading supplier to many of the largest and most innovative companies in the food & beverage, grocery, retail, distribution and general manufacturing industries. As a world leading manufacturer of plastic pallets and top frames, folding bins and reusable containers, trays and totes, Rehrig Pacific has accumulated nearly a century of design expertise in sustainable shipping and transport packaging products. We continue this heritage by offering our durable, reusable plastic Tier Sheets.

Designed for Long Life

Rehrig Pacific Tier Sheets are the ideal replacement for both fiber and corrugated sheets and are manufactured to exceed industry packaging standards. Rehrig's reusable Tier Sheets are designed and produced with precision to retain the right amounts of rigidity and strength so they won't prematurely crack or tear, resulting in immediate cost savings for our customers.

Designed for Specific Applications

Made with a proprietary co-polymer polypropylene resin, Rehrig's Tier Sheets can be customized to meet your exact stiffness and friction

requirements. Typical sizes range from 20" up to 50" in width, from 0.08" to 0.10" in thickness and to nearly any length. A large number of standard and FDA compliant colors are available. Customized printing options are also available for company names and product identification purposes.

Designed to Safeguard

Unlike fiber and corrugated sheets, plastic tier sheets won't absorb moisture that causes deformation and deterioration and can harbor bacteria and other forms of contamination. Rehrig Tier Sheets can be washed and disinfected, delivering a higher level of product protection. These plastic sheets are extruded with the proper coefficient of friction, resulting in improved load stability and seamless integration.

Designed for Sustainability

Withstanding both cold and hot-humid environments, every Rehrig Tier Sheet is manufactured to deliver a longer service-life, once again delivering on our promise of greater sustainability. And, when their useful life is over, Tier Sheets are 100% recyclable. Rehrig Pacific will even work with you to develop a customized buy-back program which insures a greater value for used Tier Sheets.

Asset Management Solutions

As a total solution provider, we offer asset management and reverse logistics solutions

which can deliver significant additional savings. Rehrig Penn Logistics can provide a customized pooling program which will manage and track your investments, including pallets and other dunnage as well. RPL can also clean, return or recycle every tier sheet insuring maximum value. Our nationwide team of experts is ready to meet with you and plan an optimized and sustainable solution that will improve efficiency and reduce costs.

Typical Industries Using Tier Sheets

- Rigid containers
- Beverage
- Consumer goods
- Automotive
- Printing
- Lumber and construction

Other Rehrig Extruded Products

- Slip sheets
- Liner sheets
- Layer sheets
- Cap sheets
- Divider sheets
- Separator sheets
- Pallet pads
- Feedstock for thermoforming

COMMON SIZES (W x L)	
in.	mm
44 x 56	1,178 x 1,422
40 x 48	1,016 x 1,219
39.4 x 47.2	1,000 x 1,200
45.3 x 49.2	1,150 x 1,250

SPECIFICATIONS		
	in.	mm
Min. Width	20.00	508.00
