

# DSD One-Touch System

Delivering Superior Results for Direct Store Deliveries

Rehrig's DSD Delivery System provides more flexibility, measurable DSD productivity benefits and financial savings.

Our DSD One-Touch Delivery System offers measurable DSD productivity benefits and impressive financial savings over the traditional side-bay trailer and hand truck delivery method. This integrated and ergonomic delivery system significantly reduces labor and fleet costs by improving the picking, loading and delivery of DSD retail products.

Using DSD Pallets moves product picking to the source – the distribution center or production facility. Individual store orders with a larger variety of SKU's can be placed on high-strength DSD Pallets and quickly loaded onto a more versatile, standard transport trailer. Delivery into the retail outlet is also simplified. Our design enables route sales to deliver up to five times more product per trip and maneuver easily in narrow aisles and around sharp corners.

By eliminating picking at the store and reducing in-store delivery time, wholesale productivity improvements are possible. More stops can be made with fewer routes needed to deliver the same amount of product.

Smaller fleets and reduced fuel usage significantly lowers costs and your company's carbon footprint, improving its overall sustainability scorecard. In addition, worker injuries due to awkward reaching and repetitive heavy truck-side case lifting are reduced.

## Picking

Products are picked directly onto our DSD Pallets. Pick one or two orders simultaneously. A greater variety of SKU's can now be picked.

## Loading

Our DSD Pallets can be loaded facing either direction for greater efficiency and staging orders within the transport trailer. Only the correct amount of product is loaded.

## Delivery

Delivery time at each location is greatly reduced. Route sales deliver more product per trip and make more deliveries per day.

A FAMILY TRADITION OF GROWTH, SERVICE AND INNOVATION

**DSD System Advantages**

- Allows efficient order picking in warehouse
- Handle more SKUs than side-bay trailer
- Use DSD Pallets or standard pallets
- Pick two orders simultaneously
- Use more versatile transport trailers
- Stage orders in trailers
- Empties nest efficiently in warehouse and trailers
- Ship only product needed
- Handles five times more product than hand trucks
- Reduces number of trips per order
- Maneuvers easily in stores
- Increases number of stops per day
- Deliver to big box or convenient stores on same vehicle
- Use fewer trucks to handle same amount of goods
- Reduce carbon footprint, improve sustainability scorecard
- Build high-visibility in-store displays

**Options**

- Large selection of standard or optional colors
- Molded-in or hot-stamp branded logos
- Multi-color in-mold labels
- Bar coding or RFID identification and tracking
- Manual steering dollies (pair)

**DSD Lift**

Powerful, motorized electric lift with a long lasting charge. Dual hand controls. Short turning radius. Safety strap. Easy to operate.

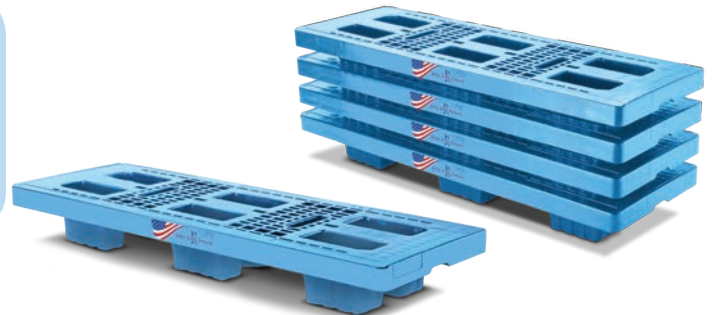

**DSD System Platform Options**

DSD Lifts can be used with one DSD Pallet lengthwise, two DSD Pallets widthwise and most wooden or plastic pallets used in the retail trade.

**DSD Pallets**

Both short and long DSD Pallets distribute loads evenly and are highly nestable for efficient empty storage in the warehouse and trailers.
