

Rehrig Pacific Agricultural Solutions

Improve productivity, reduce shrink and enhance the customer experience

As logistics optimization experts, Rehrig Pacific improves each movement of how fresh produce from the field to the store aisle - preserving that fresh, just-picked flavor and optimizing what our customer delivers to their customer. Rehrig Pacific's rugged and reusable packaging solutions minimize costs and even provide ways to improve merchandising.

Rehrig Pacific agricultural packaging solutions are designed to deliver superior product protection so produce arrives at its destination stem-perfect. The materials we utilize will not wick moisture and dehydrate your produce as corrugated packaging does. Their well-ventilated side-walls allow produce to cool faster, and their smooth interiors protect products from bruising and mechanical damage. With packaging from Rehrig Pacific you will extend product shelf life, use less ripening gases such as Grape SO2 in long-term storage, and gain the freedom to time deliveries for the best profit potential. We offer a wide selection of reusable agricultural containers proven to withstand the rigors of field picking, transport, storage delivery and merchandising.

When integrated with RFID or NFC technology, Rehrig Pacific agricultural containers can also provide valuable business intelligence and enhance consumer engagement. From the field to the retail location, Rehrig Pacific can help you maximize profits and minimize shrink.

TRANSPORT MORE PRODUCE

Engineered to enable more crates and totes to be stacked per truckload.

PRESERVE PRODUCT FRESHNESS

Enhanced side-wall ventilation and smooth interiors deliver maximum product protection.

IMPROVE MERCHANDISING

Designed to save time and money through use as displays in produce section.

A FAMILY TRADITION OF GROWTH, SERVICE AND INNOVATION

Agricultural Optimization

Solutions that optimize every step in the fresh produce supply chain, improving profitability and reducing shrink

100% recyclable HDPE and PP

Will not wick moisture or absorb gasses. Use less SO₂, decelerate spoilage and time deliveries for advantageous pricing.

UV Stabilizers & Anti-Oxidant Package

Protects crates and containers from sun damage and promotes long-term container durability, even in high heat applications.

Smooth Interiors

Protects delicate products from harm and bruising, improving profitability.

Well-Ventilated Side-Walls

Optimized ventilation design enables products to cool quickly, extending product shelf life.

Secure Stacking & Nesting

Rugged and lightweight design allows more product to be shipped, and efficient nestability reduces storage requirements at every point in the supply chain.

Display Ready

Retail friendly containers keep products looking their best in the produce aisle, and when integrated with our technology option can provide enhanced business intelligence and consumer engagement.
