Features & Benefits
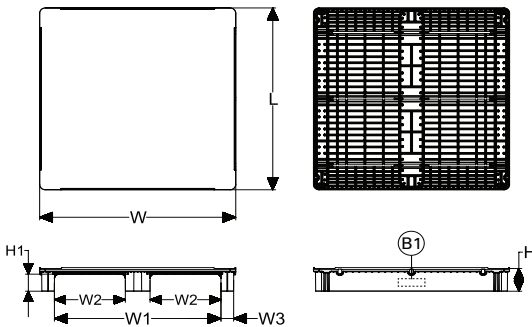

• High-pressure injection molded plastic pallets made from UV stabilized high impact co-polymer PP resin that will not absorb moisture or bacteria. The non-porous, cleanable, solid deck makes this pallet an optimal solution for sanitary environments.

• Rehrig's 40 x 40 Pallet is designed for storage, handling, and shipping of dairy cases and products.

• Roughened top deck reduces slippage and helps keep loads in place while maximizing surface area.

• Design is ideal for stack loading, conveying systems, distribution, and cold storage.

• Both rugged and lightweight, the Rehrig Dairy Pallet is easier to handle than comparable wood or other plastic pallets.

• High-pressure injection molding allows Rehrig Pacific designers to strategically vary wall thickness to achieve lighter, yet stronger, plastic pallets when compared to other molding processes.

Options

• Colors: Choice of standard or FDA approved colors

• Decoration: Hot-stamp branded logos

• Edge lip: Molded-in straight or beveled perimeter deck lip

• Stringers: 2.5" or 3.8" outside stringers

• Reinforcement: Offered with or without steel reinforcements

• Top Deck Surface: Light, heavy, or no scuffing

• RFID compatible, works with Vision™ Software solution

SPECIFICATIONS	IN/LB	MM/KG
Length (L)	40.0	1,016
Width (W)	40.0	1,016
Height (H)	5.0	127
Overall Fork Pocket Width (W1)	34.0	864
Individual Fork Pocket Width (W2)	14.5	368
Outer Stringer Width (W3)	2.5	63.5
Fork Pocket Height (H1)	3.75	95
Weight	34.0	15
Static Load Rating	10,000	4,536
Dynamic Load Rating	2,500	1,134
Maximum Edge Rackable Load	3,000	1,361
53' Trailer Quantity	750	

*All specifications in table including the Reinforced (R) and non-reinforced (NR) information are applicable for both the wide and narrow stringer options

DECORATION AREAS	WIDTH (IN)	HEIGHT (IN)
Barcode or RFID Area (B1)	6.0	2.0
