Rehrig Pacific Company

QTEK DESIGN

Make the Switch from Damaged to Managed

Rehrig Pacific's QTEK Pallet Exchanger PX product line can transfer go-from pallets onto go-to pallets and exchange complex or simple loads, eliminating the need to push or invert.

Pallet Exchanger

Key Features:

- Exchange pallets in less than 45 sec
- AC power: standard 110VAC at 15-amp outlet
- 2 CFM @80 psi compressed air
- Dual adjustable clamp pressures
- Installation and set to run in two hours
- Operators trained in one hour
- Low maintenance
- Requires minimal 13 x 12 ft. floor space
- Tested with 3,500 lb. loads
- Clamps Standard: four rubber clamps
- Standard blades for complex loads

Benefits:

50% **50% reduction in load transfer time**

<12 mos. **Strong ROI**

33% **33% reduction in product damage**

What our customers are saying:

"Our production efficiencies (during the pallet transferring process) with the PalletX have been increased by 50%, which means time and manpower savings."

– R.C., Facility Manager, UTi

"Glad we are replacing the inverter with a PalletX. Handling a wider range of loads, cutting exchange time in half, and a safer way are among the benefits of the Rehrig Pacific pallet exchanger."

– L.P., Project Engineer, Unilever Ice Cream

With Rehrig Pacific's QTEK Pallet Handling Solutions, you can enhance productivity, maximize storage efficiency, and ensure safety in your warehouse operations. Trust in our innovative products to keep your business running smoothly, one pallet at a time.
