Rehrig Pacific Company

QTEK DESIGN

High-Density Storage. More Floor Space. Greater Efficiency.

The Pallet Tower is a high-density storage solution for up to 63 pallets in a 5' x 5' footprint, accommodating different ceiling heights from 24' x 32'. Ideal for plastic, wood, 4-way, 2-way pallets, from the standard 48D"x40"W to custom sizes.

Pallet Tower

Key Features:

The **Pallet Tower** is a modular, mechanically operated pallet storage system with a 5 ft × 5 ft footprint, capable of storing up to 63 pallets at heights ranging from ~24 ft to ~32 ft. It features ⅛-inch steel panels on three sides, with the front open for forklift access and the top open to the ceiling. It requires no building power connection.

Potential Applications:

- Clustered near docks for efficient storage and retrieval of incoming truckloads.
- Near process areas to reduce fork truck travel time.
- Anywhere requiring efficient pallet storage and retrieval.

Specifications:

- Holds up to 63 pallets of any 48"D × 40"W wood or plastic pallet type, including 2-way and 4-way configurations.
- Small footprint. ONLY 5FTx5FT and NO AC Power is required.
- Custom pallet sizes and storage heights available.
- Loaded from the bottom. So, no special equipment is required for reloading.

Benefits:

- **Increased storage and retrieval flexibility**
- **Reduction in manual handling risks and pallet tipping**
- **Save up to 75% of storage footprint**
- **Easier 5S programs, improved workspace appearance, and increased morale**

With Rehrig Pacific's QTEK Pallet Handling Solutions, you can enhance productivity, maximize storage efficiency, and ensure safety in your warehouse operations. Trust in our innovative products to keep your business running smoothly, one pallet at a time.
