

Fully Automated Bear Resistant Carts

(95, 65, and 35 Gallon Available)

Rehrig Pacific manufactures the only full line of Residential Bear Resistant Carts that are ANSI Certified and fully ASL compliant. Our proprietary lock design does not require unlocking before pick up. Keeping bears out while keeping residents and drivers warm.

Designed with all users in mind, the ergonomic locking mechanism allows this container to easily be opened by humans with one hand, but prevents bears from opening with claws, paws, and teeth!

What makes it bear resistant?

When a bear realizes that the bin is too hard for them to open, they lose interest and move along. Our cart is tough and smart, made out of rugged materials and equipped with a tamper-proof lid that won't open for bears, but opens for trash pickup when completely inverted by semi- or fully-automated waste collection systems. Which means waste collection providers don't have to change a thing.

Benefits and Features

- Includes a Gravity Lock designed specifically to keep bears and other critters out while automatically unlatching during the tip or service cycle.
- Includes a Thermoformed Lid designed with 2 layers of heavy-duty plastic material including a 2.5" overlap between the cart body and the inner lid which aid in preventing unintentional access by a bear.
- Addition of Body Bars to increase the structural strength around the upper rim of the cart.
- **ANSI Compliant**
