

Introducing ocean^{core}

The first cart made with ocean-bound plastics.

Rehrig Pacific has developed an innovative new solution in diverting and utilizing ocean-bound plastics. The OceanCore recycling cart is the first roll out cart made with ocean-bound plastics.

OceanCore is the result of Rehrig Pacific's unique manufacturing expertise: We've developed a first-of-its-kind process that allows us to combine virgin plastic with unmatched volumes of recycled material. The result is a product that contains more recycled material than previously thought possible, without compromising the structural integrity or appearance of the final product.

"If you build something that's made from recycled material, but lasts half as long and ends up getting discarded more quickly, you don't have a real solution. Rehrig is driven to find solutions that will actually solve the problem. We're actually building a model for responsible recycling and sustainability solutions by demanding that we think in terms of the entire global supply chain."

– Jeff Hentges, SVP of Operations

Features & Benefits

- The first roll out cart made with ocean bound plastics
- Contains 40% PCR including 10% Ocean plastics
- Includes industry leading 10 Year warranty for greater sustainability
- 100% Recyclable at end of life.

Sustainable containers
designed to move
products efficiently.

Each ocean^{core} cart contains the
equivalent of saving thirty 2 Liter Bottles
from our oceans.
