

## Service Verification

# Manage waste without wasting time.

Through an RFID reader, our Service Verification is used to scan RFID-enabled containers and capture vital details in real-time such as account information and GPS locations. With this information, dispatch can make immediate decisions regarding workflow and evaluate data to manage on-going logistics.

**\$12K**

Annual capital spending eliminated

**80%**

Decrease in secondary service container trips

**\$240K**

Yearly savings

Rehrig Pacific implemented an end-to-end solution including carts, assembly and distribution, and technology that helped our city better utilize our workforce and optimize our collection operations. Rehrig Pacific delivered on everything they promised.

— **Maraskeshia Smith**,  
Deputy Director City of Cincinnati
