

Foodservice Material Handling Solutions

Smarter, Safer, More Efficient Operations—Powered by Hybrid Sled, Duo Lift 2.0, and QTEK Pallet Handling Solutions

Common Foodservice Pain Points:

High driver turnover and safety risks due to physical strain and injury

Time-consuming pallet breakdown and restacking

Damaged goods during delivery and staging

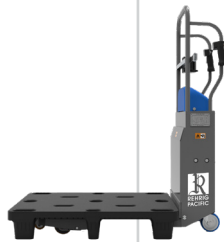

Inefficient trailer pack out, not maximizing cubic feet

Inaccurate deliveries caused by large number of customers on mixed pallets leads.

Hybrid Sled

Drop-zone delivery reimaged.

- Easy roll-on, roll-off design for quick and safe deliveries—no ramp or heavy lifting needed.
- Perfect for back-of-house maneuvering in tight spaces.
- Reduces driver fatigue and injury risk.
- Compact size fits side lift gates and enables faster unloads, with no need for hand trucks or manual heavy lifting.
- Helps maintain load integrity with smoother transfers thanks to its electro-hydraulic pump system.

Ideal for: Chain restaurant distribution networks with spacious backrooms and 29" wide pallets.

Duo Lift 2.0

Retractable tines make it easy to handle all pallet types, delivering ergonomic performance that reduces strain and increases efficiency.

- Power-assisted, elevated lifts adapt to various pallet sizes, improving ergonomics and maximizing trailer pack-out efficiency.
- Lightweight lithium-ion battery powers a 4,000 lb lift capacity.
- Perfect for high-frequency deliveries and heavy products.
- Smart IoT options available for fleet tracking and usage monitoring.
- Reduces injury claims and speeds up deliveries.
- Seamlessly integrates with QTEK Pallet Handling Solutions and traditional pallets.

Ideal for: Food manufacturers, foodservice broadliners, and regional DSD operations, especially those serving large-format or chain-driven stores, using Rehrig Pacific's versatile reusable pallet sizes to fit diverse delivery needs.

QTEK Pallet Handling Solutions

Reengineered pallets and pallet management for a reimagined foodservice supply chain.

- Enhances warehouse productivity, maximizing storage and safe warehouse operations.
- Innovative pallet storage and dispensing speeds up product storing, pallet usage and more.
- Minimize damaged goods with smoother transport and better stacking.
- Accommodates Rehrig Delivery pallets, as well as standard 48x40 plastic and wood pallets, including CHEP.

Ideal for: Tidy pallet storage, seamless pick path launch, layer picking and pallet exchanging.

Rehrig Foodservice 44x23 Duo Pallet

Engineered for drop-and-go delivery excellence in cooler and back-room environments.

- Lightweight and nestable design for easy handling and storage
- Ergonomic handles improve safety and maneuverability
- Anti-slip top deck prevents case sliding
- Fully recyclable and made from recycled materials
- Seamlessly integrates with Duo IoT and RFID tracking solutions

Ideal For: Foodservice, beverage, and Beer distributors seeking efficient, sustainable, and tech-enabled delivery solutions.

Rehrig Foodservice 29x42 Nestable Delivery Pallet

Designed to streamline delivery operations while maximizing durability, safety, and sustainability.

- 4-way entry and optimized footprint for smooth navigation in tight space.
- Highly nestable design saves space during storage and transport
- Lightweight with ergonomic handles for safer, injury-reducing handling
- 100% recyclable with optional recycling program for end-of-life value
- Customizable with color options, hot-stamped logos, and RFID compatibility

Ideal For: Foodservice distributors seeking a durable, space-saving pallet that improves delivery efficiency and supports sustainability goals.
