

Visual Verification

Increased visibility and transparency

Visual Verification provides increased clarity for waste haulers and customers with the use of a two-camera system that captures service completion, identifies curbside contaminants, and records bulky pick-ups. With this solution, visual evidence of services, or attempted services, are easily documented and verified.

Camera view

Features & Benefits

Improved Customer Service

- Provides photographic proof that service was completed or attempted
- Identifies customers that may need larger carts or extra pick-ups
- Records missing or misplaced carts

Environmentally Responsible

- Documents contamination
- Tracks and obtains evidence of illegal dumping
- Helps cities identify households not following environmental rules

Greater Driver Efficiency

- Helps operators know the size and stream
- Plans work orders accordingly
- Eliminates the needs for additional bulky pick-up canvassing
