

Bomber

Layer After Layer of Undamaged Goods

Meet the QTEK Bomber:
The world's only layer picker + pallet exchanger.

The Rehrig Pacific's QTEK Bomber has the ability to hold multiple layers of different type of products at the same time, from hard to delicate, with no need to push or invert, which means significantly less product damage. With an exceptionally small footprint, the Bomber will maximize space in your operation. Need to move frozen goods? No problem. This tough yet gentle giant can be prepared to work at low temperatures and still offer maximum efficiency. So you can move product in no time, with no hiccups.

Key Features & Installation:

- AC power: standard 110VAC at 15-amp outlet
- 70 psi compressed air clamp operation
- Auto-set clamping mechanism
- Operators trained in one hour
- Low maintenance
- Requires minimal 7ft x 7ft footprint x 13ft height clearance
- Tested with 3,500 lb. loads
- Dual adjustable clamp pressures
- Four rubber clamps
- Optional risers for tall loads

Benefits:

Split pallets, remove damaged layers and create or combine loads

Reduce the time manually loading by at least 50%

Operator friendly

Installation and set to run in 4 hours

With Rehrig Pacific's QTEK Pallet Handling Solutions, you can enhance productivity, maximize storage efficiency, and ensure safety in your warehouse operations. Trust in our innovative products to keep your business running smoothly, one pallet at a time.
