

# Vision<sup>SM</sup>

Actionable business intelligence that empowers you to make better decisions.

# It doesn't take a rocket scientist to use. Just one to create it.

Vision<sup>SM</sup> is a dynamic, easy-to-use software suite that includes applications to track your assets in real time using RFID, GPS and barcode. Vision<sup>SM</sup> gives you multi-level visibility that will help reduce operating costs, increase sales and preserve capital. And, it can easily integrate with your existing technology.

# asset tracker

Asset Tracker is your watchdog of operations, improving asset utilization and visibility within your supply chain in real time. Asset Tracker includes dashboards and analytics to monitor reusable transport packaging.

# How it Works

Rehrig Pacific supplies Smart Assets (barcode and/or RFID-enabled) or retrofits existing assets.

Rehrig installs tracking equipment to read outbound and inbound Smart Assets. Asset Tracker API is available for additional data collection.

Selector picks products on Smart Assets to be shipped. Smart Assets are read by tracking equipment.

Smart Assets return from the market back to the building, and are read by tracking equipment.

Management accesses real-time reporting and analytics via Asset Tracker software (ex: Smart Asset trip time, Smart Asset balance reports, Smart Asset utilization rates).

Management routinely views Asset Tracker software to identify trends, improvement opportunities, and red flag scenarios.

## App Details

Our customers face a serious challenge managing their company-owned reusable transport packaging assets. The lack of visibility of these assets drives inefficiencies into their operation, increasing costs and reducing operational effectiveness. Our proprietary software provides our customers the opportunity to improve their asset utilization. Improved asset utilization is provided via increased asset accountability, resulting in fewer lost assets. Asset utilization benefits are realized by improved ROI on reusable asset purchases and reduced operational downtime due to the lack of available assets. Optimizing their reusable assets delivers improved asset cycle times and reduced asset dwell times.

Rehrig's Asset Tracker app manages all asset transactions through Rehrig's proprietary, native Android app, accessed via RFID handheld devices and fixed RFID readers. Our software allows customers to track Rehrig's RFID-enabled assets or other manufacturers' assets affixing external RFID tags or human-readable barcodes. Users can access the data within our application via their mobile device or desktop computer. Either method allows users to access all of our standard reports, as well as customizable dashboards/widgets.

# About Rehrig Pacific

Founded in 1913, Rehrig Pacific's scientific curiosity and nearly-molecular attention to detail has made us the industry leader in reusable transport packaging, mechanical systems, and technology solutions. By digging far below the surface of supply chain and waste and recycling challenges, and applying knowledge of all the forces and materials involved, Rehrig Pacific sees solutions where no one else does. That's the power of physics. And Rehrig Pacific.
